Poland's position on the Ministerial Decision
**“Supporting the recovery and sustainable management of Ukrainian forests
and its forest sector”.**

Poland recognizes the need to send a strong political signal of solidarity with Ukraine, condemning Russia's military aggression against Ukraine. Poland stands with the Ukrainian government and people and expresses its continued readiness to support Ukraine in the recovery of the forest sector.

Therefore Poland counted on a stronger tone of the ministerial decision, expressing solidarity with Ukraine and condemning Russia's aggression. However, recognizing the need for urgent support for the forestry sector in Ukraine, in the spirit of a compromise, Poland agrees with the final version of the Ministerial Decision.
